Pizza Glee — Full Website Audit

Site: https://pizza-glee.take-eats.jp/ **Audited:** 29 Oct 2026 (JST) — data crawled 28 Oct 2026, 15:20–15:22 UTC **Purpose:** Complete data extraction so a new website can be rebuilt from it. **Companion files:** `products.csv` / `products.json` (all 50 products, machine-readable), `slides.json` (hero images)

---

1. Executive summary

- This is **not a standalone website** — it is a storefront on **Take Eats (take-eats.jp)**, a Japanese takeout / pre-order SaaS platform. The whole site is essentially one menu page + one page per product + a shop-selection flow.
- **50 products** in 4 categories: 28 pizzas, 2 Half & Half builders, 16 side menu items, 4 drinks.
- **2 physical shops** use this one storefront (Hiji and Beppu, both in Oita Prefecture). The customer picks a shop / pickup method first ("受け取り方法未設定" = pickup method not set, shown at the top of the homepage).
- **55 images** total: 5 hero slides + 50 product photos, all hosted on CloudFront (`d1umvcecpsu7ql.cloudfront.net`).
- Language: Japanese only. Currency: JPY. No English version, no allergen info, no pizza size in cm anywhere in the extracted text.
- Everything needed to rebuild the menu is in `products.csv` / `products.json`. Business details that are *not* on the menu page (addresses, hours) live on the shop-info pages — extracted in §3.

2. Site map / URL structure

Page type	URL pattern	Notes
Home / menu	`/`	Title: `〖公式〗Pizza Glee | テイクアウト（お持ち帰り）ネット予約`
Product	`/product/{id}`	e.g. `/product/34983` = Margherita M. Title pattern: `{Product name} | 〖公式〗Pizza Glee | テイクアウト（お持ち帰り）ネット予約`
Shop info / select shop	`/select-shop-info/{shop_id}`	`2449` = Hiji shop, `2048` = Beppu shop. Title: `店舗を選ぶ | …`

That is the entire discoverable public structure from the menu and search indexing: 1 home page + 50 product pages + 2 shop pages = **53 pages**. Cart, checkout, login and account pages sit behind the ordering flow on the platform and are not public/content pages — you do not need to rebuild them if you stay on a similar platform; if you build standalone, see the rebuild blueprint in §9.

Product ID gaps (e.g. 35002, 35004–35006, 35008, 35031–35034, 35036 are missing) suggest deleted/hidden products or platform-internal variants in the ID sequence. Nothing public is missing from the menu — all 50 homepage items resolve to a live product page.

3. Business / shop data

Shop 1 — Pizza Glee 日出店 (Hiji)

- Shop ID on site: `2449` — https://pizza-glee.take-eats.jp/select-shop-info/2449
- Address: 〒879-1505 大分県速見郡日出町川崎837番地68 さとうビル (Sato Building, 837-68 Kawasaki, Hiji-machi, Hayami-gun, Oita 879-1505). External listings add "1F".
- Pickup hours: **11:30–20:00, every day** (Mon–Sun, no closed day shown)
- Earliest pickup shown at audit time: 29 Oct 2026, 11:30
- Payment: 事前にオンライン決済 (online prepayment) / 店頭支払い (pay in store)
- Phone (from external Places/listing data, **not shown on the site itself**): 0977-76-8771 — verify before publishing on a new site.

Shop 2 — Pizza Glee 別府 (Beppu)

- Shop ID on site: `2048` — https://pizza-glee.take-eats.jp/select-shop-info/2048
- Address: 〒874-0919 大分県別府市石垣東6-6-3 睦吉ビル101 (Mutsuyoshi Building 101, 6-6-3 Ishigaki-Higashi, Beppu, Oita 874-0919)
- Pickup hours: **11:30–20:00, every day**
- Earliest pickup shown at audit time: 29 Oct 2026, 11:30
- Payment: online prepayment / pay in store
- Phone (external listings only): 0977-23-0147 — verify before publishing.
- External description for this shop: ピザのテイクアウト専門店 ("takeout-only pizza shop"), price level: inexpensive.

Shop 3 — Pizza Glee 高崎店 (Takasaki) — *added by live verification, see §11*

- Shop ID on site: `4857` — https://pizza-glee.take-eats.jp/select-shop-info/4857
- Address: 〒870-0872 大分県大分市高崎3丁目12-7 ナガトミビル101 (Nagatomi Building 101, 3-12-7 Takasaki, Oita City, Oita 870-0872)

- Pickup hours: **11:30–20:00, every day**. Earliest pickup shown at audit time: 30 Oct 2026, 11:30 (one day later than the other two shops)
- Payment: online prepayment / pay in store
- Phone (external listings): 0975-44-5757 — verify before publishing.

4. Homepage structure (in order)

1. Header state: 受け取り方法未設定 (pickup method / shop not yet selected)
2. **Hero slideshow — 5 slides** (full URLs in `slides.json`):
   - `slides/qP2pGzk06DTOjSmL0TvckActMFUto3ho2hJrPhRK.jpg`
   - `slides/ILz4Mvi6ePA4pTsJoTZEV6nctOhLPzNnXy9y91Jr.jpg`
   - `slides/ikcFBC2jrCgitVDdOU898VwpLlH1QT1bT9jlDMwZ.jpg`
   - `slides/MsuJp8NzWVTuUMNJDHyHKbv8EVfUBC1KxbN4un4R.jpg`
   - `slides/JehlyEkkKyRLMQ8QerZUnFME23MQZ4n1dk8dIOCl.jpg`
   - Alt text on all 5 is only "スライド 1–5" (Slide 1–5) — no descriptive text.
3. Category section: **ピザ (Pizza)** — 28 items
4. Category section: **ハーフ＆ハーフ (Half & Half)** — 2 items
5. Category section: **サイドメニュー (Side Menu)** — 16 items
6. Category section: **ドリンク (Drinks)** — 4 items

Every product card shows: photo, name, M/base price, and a 数量・オプションを選ぶ ("choose quantity / options") action that opens the product page.

5. Full menu — summary

Full data (ID, name, price, description, options, product URL, image URL at w=1280 and w=512) is in **`products.csv`** / **`products.json`**. Headlines:

Pizza (all sold as "M", with an L-size upgrade option on the product page)

Price range M: **¥1,200–¥1,850**. L upgrade where captured: **+¥1,150 to +¥1,800** (L total = M price + upgrade, calculated in the CSV). Cheapest: マヨコーンピザ M ¥1,200. Most expensive: ぷりぷりエビの旨塩ガーリック M ¥1,850. Best-seller callout in copy: もちっこ M ¥1,300 — "人気ナンバー1！" (No.1 popular).

L options — all verified live (see §11): every pizza has exactly one option, the L-size checkbox; there are no topping options on any pizza. The 8 upgrades that text extraction missed are now confirmed in the CSV: もちっこ +¥1,250 (¥2,550), コンビネーションピザ +¥1,450 (¥2,950), マヨじゃがジェノベーゼ +¥1,470 (¥2,950), 4種のチーズピザ +¥1,350 (¥2,800), ホットチリドッグ +¥1,550 (¥3,150), 海老とベーコンのガーリックトマト +¥1,620 (¥3,300), 角切りベーコンスペシャル +¥1,700 (¥3,450), ねぎカルビ +¥1,700 (¥3,450).

Half & Half (price is built from two half-charges; base price displays ¥0)

M size (product 104155) — half charge per flavour (¥): 挽肉と木の子 800 / イタリアンソーセージと季節野菜のチーズソース 840 / スモークサーモンとクリームチーズ 865 / マルゲリータ 675 / 4種のチーズ 725 / コンビネーション 750 / もちっこ 650 / ねぎカルビ 875 / Gleeスペシャルミックス 900 / ツナマヨ 625 / 海老とベーコンのガーリックトマト 840 / サラミDX 790 / 完熟トマトのカマンベール 790 / マヨコーン 600 / 男爵ポテト 750 / ジャーマンポテトスペシャル 790 / マヨじゃがジェノベーゼ 740 / ガーリックミート 790 / ホットチリドッグ 800 / スパイシーデラックス 790 / ミートグルメスペシャル 890 / ガーリックカルビ 850 / もち明太 815 / 海鮮シーフードミックス 890 / テリヤキチキンマヨネーズ 850 / 角切りベーコンスペシャル 875 / ぷりぷりエビの旨塩ガーリック 925 (27 flavours — デリシャスフォー is excluded, sensibly, as it is already a 4-flavour pizza.)

L size (product 104156) — description: お好きなLサイズピザをハーフ&ハーフで！ Half charges (¥): 挽肉と木の子 1,575 / イタリアンソーセージ 1,650 / スモークサーモン 1,700 / マルゲリータ 1,475 / 4種のチーズ 1,400 / コンビネーション 1,475 / もちっこ 1,275 / ねぎカルビ 1,725 / Gleeスペシャルミックス 1,775 / ツナマヨ 1,225 / 海老とベーコンのガーリックトマト 1,650 / 完熟トマトのカマンベール 1,550 / マヨコーン 1,175 / 男爵ポテト 1,475 / ジャーマンポテトスペシャル 1,550 / マヨじゃがジェノベーゼ 1,475 / ガーリックミート 1,550 / ホットチリドッグ 1,575 / スパイシーデラックス 1,550 / ミートグルメスペシャル 1,750 / ガーリックカルビ 1,675 / もち明太 1,600 / 海鮮シーフードミックス 1,750 / テリヤキチキンマヨネーズ 1,675 / 角切りベーコンスペシャル 1,725 / ぷりぷりエビの旨塩ガーリック 1,825 / サラミDX 1,550

Side Menu (16 items, ¥300–¥1,150)

ロック唐揚げ in 4 flavours (塩 ¥510 / 柚子胡椒 ¥560 / スパイシー ¥580 / コチュジャンマヨ ¥600), フライドポテト M ¥350 (L +¥250), フライドポテトM バター醤油 ¥380 (L +¥250), オニポテ ¥580, オニオンリング ¥410, チキンナゲット 5ヶ ¥380 (10ヶ option +¥350), チーズポテトボール 8ヶ ¥380, レッドホットチキン 5本 ¥420, チキンボックス ¥780, ミックスコンボ ¥900, パーティーパック ¥1,150, 串フランクフルト 2本 ¥360, 骨なしフライドチキン 1ヶ ¥300. Combo contents are spelled out in the descriptions in the CSV (e.g. Party Pack = 唐揚げ6ヶ・チキンナゲット6ヶ・オニオンリング8ヶ・フライドポテト200g).

Drinks (4 items)

Glee特製バナナジュース ¥420 / コカコーラ 700ml ¥180 / オレンジジュース 425ml ¥180 / ジンジャーエール 700ml ¥180.

6. Images inventory

- **55 images**, all JPG on CloudFront: `https://d1umvcecpsu7ql.cloudfront.net/storage/uploads/{slides|products}/{hash}.jpg`
- The same file is served resized via query param: listing pages use `?w=512`, product pages use `?w=1280`. For a rebuild, download the `?w=1280` versions from the URLs in `products.json`

(largest publicly served size found).

- Copyright note: these are the shop's own product photos on its current platform. If you are not the shop owner, get permission before reusing them on a new site — the URLs are recorded here for reference either way.

7. Ordering flow (as a customer sees it)

1. Land on menu → banner says pickup method not set.
2. Select shop (Hiji / Beppu) and pickup date-time — pickup window 11:30–20:00 daily; earliest slot shown was next morning 11:30.
3. Browse categories → product page → choose quantity and options (size upgrade / half & half flavours / count options) → add.
4. Checkout with online prepayment, or choose pay-in-store.

8. Technical & SEO audit

Platform / stack clues

- Hosted SaaS: take-eats.jp subdomain (`pizza-glee.take-eats.jp`). No custom domain, no visible CMS of their own.
- Images: Amazon CloudFront CDN. Product routing: simple numeric IDs (`/product/{id}`).
- No blog, news, about, or content pages — zero content marketing surface.

SEO

- Title tags are consistent and keyworded for テイクアウト ネット予約 (takeout online booking) — good local-intent targeting.
- Product pages each get a unique title with the product name — good.
- Weaknesses: hero images have meaningless alt text (スライド 1–5); no descriptive meta content was visible in the extracted page text; a subdomain on the platform's domain means the shop builds **no domain authority of its own** — the strongest SEO argument for the rebuild is moving to an owned domain.
- Both shop pages are indexable and do appear in search with address/hours — that local visibility should be preserved (or redirected) in any rebuild.

Content quality issues found (fix these in the rebuild, don't copy them blindly)

1. スモークサーモンとクリームチーズピザ description reads "甘じょっぱさがクセになる王道ハワイアンピザ🍕" — it describes a *Hawaiian* pizza. Copy-paste error.
2. サラミDX description: "THE アメリカン**ビザ**" — typo for ピザ.
3. L Half & Half list: "4種のチーズ**ビザ**" — same typo.

4. Half & Half lists call one flavour "ガーリックミート**ピザ**" while the product itself is just "ガーリックミート" — inconsistent naming.
5. All 4 drinks have placeholder descriptions (the name repeated) or none; 骨なしフライドチキン description also just repeats its name.
6. No ingredients lists, no allergen info, no size dimensions (cm/serves) for M vs L anywhere — customers must guess what M/L means.

9. Rebuild blueprint

Data model (from the CSV): `Product { id, category, name_ja, price_jpy, description_ja, options[], image_url }`, `Shop { name, address, hours, payment_methods }`, plus a Half & Half price matrix (flavour × size → half charge) from §5.

Suggested pages for the new site:

1. Home — hero (reuse/replace 5 slides), category menu, shop selector
2. Menu / product listing (4 categories as above)
3. Product detail — name, photo, description, M/L prices, options, quantity
4. Half & Half builder — two flavour pickers with the price matrix above
5. Shop pages ×2 (address, map pin, hours 11:30–20:00, phone — verify numbers in §3 first)
6. Cart + checkout, or link out to an ordering platform if you don't want to build payments
7. New pages the old site lacks: About, allergen/ingredients, FAQ (sizes in cm!), contact

Before building, get/decide:

- Correct L prices for the 8 flagged pizzas (check the live product pages while logged into the shop's Take Eats admin, or test-order view)
- Verified phone numbers for both shops
- Whether Takasaki shop is in scope
- M/L sizes in cm and serving counts
- Permission/ownership for the 55 photos if rebuilding for a third party

10. Method & limits

- Menu, all 50 product pages, and both shop pages were fetched and read in full on 28 Oct 2026 (UTC). Prices/descriptions above are verbatim from those pages.
- Phone numbers and the Takasaki shop come from external listings (Places/search data), **not** from the site — flagged as such wherever used.
- A live-browser pass over the interactive ordering flow was also commissioned; any additional option details it surfaces (e.g. the 8 missing L upgrades, topping options hidden behind the quantity/options UI) should be appended to `products.csv` when it reports back.

11. UPDATE — Live browser verification (29 Oct 2026, 00:21–00:35 JST)

A live pass through the actual ordering UI confirmed and corrected the following. This section **overrides** earlier sections where they differ.

Corrections

1. **There are 3 shops, not 2.** Takasaki (Shop 3 above, `/select-shop-info/4857`) is on the storefront — it just isn't indexed in search the way the other two are.
2. **Menus differ by shop.** The 50 products in the CSV are the *union* catalog:
   - Beppu: 49 items — all 4 ロック唐揚げ flavours, **no** 串フランクフルト
   - Hiji & Takasaki: 47 items each — only ロック唐揚げ (塩), **plus** 串フランクフルト 2本
   - Shared items have identical names/prices across shops (spot-checked in full for Hiji and Takasaki menus).
3. **All 8 missing L upgrades are now verified** (listed in §5) and updated in `products.csv` / `products.json`. No pizza has any topping options — size is the only option.
4. **M Half & Half description** is: お好きなMサイズピザをハーフ&ハーフで！ Its option group is *required* — you must pick exactly 2 halves before the add-to-cart button enables.

New pages found

Page	URL
Pickup / shop selection	`/select-shop/takeout`
Cart	`/cart`
Privacy policy	`/privacy` — this is the **platform's** policy (株式会社ランプ / テイクイーツ事業部, Kyoto, info@lamp.jp), not Pizza Glee's own
Legal disclosure (特定商取引法)	`/law` — Pizza Glee's own operator data, below
404 page	Title: ページが見つかりませんでした. IDs confirmed as 404: 34993, 35002, 35004, 35005, 35006, 35031, 35032, 35036, 42132

No login page, no about/contact/access page, and no separate terms page exist. Header on all pages: logo (home), カート, メニュー button (Home / Instagram / Facebook / Privacy / Legal). Footer: Powered by テイクイーツ, ©2026 Pizza Glee, reCAPTCHA notice (Google).

Legal disclosure (/law) — operator data for the rebuild

- Operator: 株式会社 Lihaat Foods (Lihaat Foods Co., Ltd.), sales manager: 児玉 貞利
- Address: 〒874-0919 別府市石垣東6丁目6番3号 睦吉ビル101 (same as Beppu shop)
- Phone: 0977-23-0147 — this **confirms** the Beppu number from the site itself (it also appears on the storefront photo in hero slide 1: "TEL 0977-23-0147", "TAKE OUT ONLY")
- Email: as listed on the /law page (business contact published by law)
- Business hours stated there: 16:00–20:00 — **conflicts** with the 11:30–20:00 pickup hours on the shop pages; flag for the owner to fix
- Prices tax-included; payment by credit card or in store, confirmed at order time; handover at the requested date/time; no returns except defective products

Social links (in the site's menu panel)

- Facebook: https://www.facebook.com/profile.php?id=100070866545581

Ordering flow — verified details

- First visit shows a modal: 受け取り方法を選択してください → お持ち帰り 店舗で受け取る → shop list (with nearby-shop search and a shop-name/address search box) → shop info page (address, embedded map, hours, payment, earliest pickup, メニュー選択に進む) → that shop's menu.
- **Until a shop is chosen, every item displays as 売り切れ (sold out)** — a UX flaw worth fixing in the rebuild.
- Product page: quantity selector (− / 1 / +), option checkboxes, red add-to-cart button showing a running total that updates with options. Half & Half button stays disabled reading 必須オプションを選択してください until both halves are picked.
- Cart (`/cart`): free-text その他のご要望 (special requests) box, max 250 characters; pickup **date** dropdown = 6 days ahead (29 Oct "today" through 3 Nov in the observed session); pickup **time** dropdown = every 10 minutes, 11:30–20:00, enabled only after a date is chosen; subtotal + total (tax incl.) shown.
- **No minimum order amount** is stated anywhere.
- Checkout beyond the cart was not examined (would have required adding items / placing an order).

Still unverified

- Meta description: the live browser view does not expose meta tags, so this remains unknown — check page source or the Take Eats admin before the rebuild.
- Whether Hiji/Takasaki *descriptions/option prices* differ from Beppu for shared items (names and prices matched; full description text was read from the Beppu menu).
